Riparian Management Course

Do you own or manage land with wetlands or riparian areas? Join us for this interactive online course and we’ll help you design and manage these areas to provide diverse goods and services, such as forage, clean water, flood and drought resilience, wildlife habitat, biomass, and more!

Includes five online classes, 7-9pm on Tuesdays and Thursdays from August 4th to 18th

You will leave with a draft Management Plan for your riparian area that includes a baseline assessment of its health, goods and services you’d like it to provide, and appropriate restoration or management strategies

Cost: $20

Register on Eventbrite by July 30th: https://bit.ly/3i7FECa
